

Machine Name	String Used	Result	Depth
a plus	a	Accepted	3
a plus	ba	Rejected	0
a plus	aab	Rejected	2
abc	a	Accepted	2
abc	cba	Rejected	1
abc	aabbc	Rejected	1
same number of 1's and 0's	1100	Accepted	15
same number of 1's and 0's	1101	Rejected	8
same number of 1's and 0's	1100010	Accepted	27

Number of Configurations Explored	Average nondeterminism	Comments
4	1	Used a simple a to have a input string that I know had to be accepted
1	0	Wanted to use a input string that I knew had to be rejected
3	1	I used this string because I knew that it would run further than the previous because it began with aa, just wanted to make sure it would not accept the b
3	1	Used a simple a to have a input string that I know had to be accepted
2	1	Wanted to use a input string that I knew had to be rejected
2	1	Wanted to use this input string to ensure that the machine is reading the entire string and walking through each one
16	1	Used a simple a to have a input string that I know had to be accepted
9	3	Wanted to use a input string that I knew had to be rejected
28	4	Wanted to use this input string because I wanted to ensure it could handle a long input string and still be accurate
